Assistant Commissioner for Patents Washington, DC 20231

## Preliminary Amendment

In connection with the accompanying Reissue Application, please amend the above-identified patent as follows:

## In the Claims:

1. (Amended) Process for adjustment of a switchable, <u>electromechanical</u> flow-limiting device inside a patient's body having [at least three] <u>multi</u>stable operating states for limited flow of liquids or gases <u>from a medicament supply container inside a patient's body</u> by means of a service device outside said patient's body, said flow-limiting device and said service device being spatially separated with no bodily connection between said service device and said flow-limiting device comprising:

establishing different flow rates for said liquids or gases from said medicament—
supply container by means of different throttle paths arranged to follow
said flow-limiting device in a device that includes said flow-limiting
device, and,

transmitting energy needed for adjustment of said <u>electromechanical</u> flowlimiting device from said service device into said device that includes said flow-limiting device,

thereby switching said flow-limiting device among said [at least three] multistable
